

Streamline your next project with an **Ansarada** online data room

Ansarada is a specialist provider of secure virtual data rooms

Ansarada strives to design and provide efficient data rooms that deliver unmatched functionality without sacrificing simplicity and security. Our easy-to-administer features – such as granular reporting and security functions put you in total control, accelerate the due diligence process and maximise value.

The Ansarada team is experienced and trusted by leading advisory firms and listed companies alike. Our record results are built upon smart technology, speed of service and reliability.

“Ansarada’s technology was developed on a user-requirement model specifically for transactions so it is far more flexible and easy to deal with than other technology. We looked at alternatives that were nowhere near as good.”

Andrew Bullock, Partner, Gilbert + Tobin Lawyers

Convenient and simple to use

Designed from the ground up specifically to power due diligence online an Ansarada data room is intuitive. There are no plug-ins or software installations required, and users need only standard PC skills to collaborate online anytime, regardless of locations or time zones.

Ansarada’s online technology ensures participants can get straight to work. For instance, by using dynamic flags each user can immediately see new or modified documents in the data room and filter their view accordingly – which means they spend less time searching and more time on the project itself.

“Ansarada have developed features specifically with M&A participants in mind. Ansarada’s reporting options, ease of finding documents and the ability to monitor users’ movements give the bidders flexibility and the sellers intelligence.”

Co-ordinator, Bidder Data Process, KPMG

On demand and stress free

With Ansarada, you can create a new data room and go ‘live’ in as little as 30 minutes. We replicate the familiar Windows folder structure so you can upload folders directly from your desktop straight into your data room without delays. You can also easily customise your data room – for instance, with your own corporate branding – and set rules on who sees what information and what they can do with it, with or without Ansarada’s assistance.

Our “Software-as-a-Service” model means there are no delays, IT headaches or costly software installations. Just open your web browser and login, it’s that easy!

Ansarada’s reports capture what really matters: everything.

Ansarada data rooms offer a suite of tailorable granular reports across all users, documents and Q&A activities. Real time reports means real time intelligence.

The benefits of independent legal grade reports extend beyond providing intelligence, they also go hand in hand with security, compliance and proof of disclosure. With the ability to retrieve and archive any report at any time, you can conduct business stress free and confidently in an Ansarada data room.

Full control over Q&A workflow

Designed to accommodate any Q&A workflow required, Ansarada's unique facility caters to the nature of every serious deal manager; the need to be in control and the desire for efficiency.

As questions and answers flow through the data room their status changes according to the action required. This allows deal managers to see exactly where each question is in the resolution process and who it requires action from.

All questions can be submitted, filtered, reviewed, forwarded, answered and approved quickly and simply. Deal managers from real time reports on all Q&A activity including ageing reports and audit trails of each question and answer.

"Ansarada adjusts and tailors their software to client feedback, and it shows. The strength of Ansarada's online Q&A facility is unrivalled."

Executive, Corporate Finance, KPMG

Highest level document, application and infrastructure security

Ansarada's security is persistent and multi-layered. Its state-of-the-art security set includes Adobe's award winning LiveCycle Rights Management® to protect the authenticity of a document, the integrity of its content, and the confidentiality of the communication.

Within the data room, you dynamically control access via simple 'tick' and 'un-tick' systems controlling who sees what. You can also apply rights management security to documents with features such as print screen disabling, dynamic watermarking and document saving and viewing restrictions, as appropriate.

"What we found was Ansarada offered best of breed data-room technology. Ansarada's data room is easy for all parties to use, which in turn reduces workloads and accelerates the process for UBS"

Managing Director, UBS Investment Bank

All Ansarada infrastructure is located in highly secure, ISO 27001:2005 accredited data centre protected by biometric access controls, 24x7 on-site security staff and constant CCTV monitoring. Tier 1 backbones, redundant core network, power and climate control systems, VESDA and gaseous fire protection all combine to provide a reliable, resilient and secure platform for your project.

Ansarada is an experienced and trusted data room specialist providing powerful virtual data room facilities protected by the highest levels of security. Ansarada's customisable data rooms are powered by sophisticated technology that accelerates projects enabling controlled access by multiple users to sensitive information securely and simply via an internet browser from anywhere in the world.

"Recently, we entered into an agreement with Morgan Stanley Real Estate for an all cash offer to acquire \$6.6 billion of stapled securities in Investa. With Ansarada as our technology partner on this project, Investa was able to control the flow of information and maximise the price per security received under the offer."

Michelle Dance, Group Executive, Corporate Finance
Investa Property Group

A compelling combination: value for money with 24x7 unlimited support

Ansarada provides fast, professional support to all data room participants around the clock. The Ansarada team is dedicated to ensuring a smooth process and achieving a successful outcome for each project we undertake for our clients.

Ansarada's pricing is tailored to match the project. Our fee is determined predominantly by the size of the project and the required duration, so your costs are predictable and completely tied only to what you use during the project.

"Ansarada's online data room helped a potential licensee of our intellectual property overseas achieve a 30 fold saving in their due diligence costs."

Nina Wilkins, Director, Acrux Pharmaceutical
